## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a–z, A–Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

##### ***Input Format***

The input contains a single line containing a sentence S.

##### ***Output Format***

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: Hello world1 123 ab" @#\$ Hi

Output: Hello Hi

### **Answer**

```
import java.util.Scanner;
import java.util.Arrays;
class main{
    public static void main(String argrs[]){
        Scanner scan=new Scanner(System.in);
        String s=scan.nextLine();
        String[] arr=s.split(" ");
        int h=0;
        for(int i=0; i<arr.length; i++){
            char[] brr=arr[i].toCharArray();
            int f=0;
            for(int j=0; j<brr.length; j++){
                if(brr[j]+1>61){
                    f++;
                }
            }
            if(f==brr.length && brr.length>1){
                System.out.print(arr[i]+" ");
                h=1;
            }
        }
        if(h==0){
            System.out.print("No valid words.");
        }
    }
}
```

**Status : Correct**

**Marks : 10/10**
